Subscription Rates

Annual Institutional Subscription Rates 1997: Europe, The CIS and Japan 2272 Dutch Guilders. All other countries US$1403. Associated Personal Subscription rates are available on request for those whose institutions are library subscribers. Dutch Guilder prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.
Any enquiry relating to subscriptions should be sent to:

The Americas: Elsevier Science Customer Support Department, P.O. Box 945, New York, NY 10010, U.S.A. [Tel: (+1) 212-633-3730/1-888 4ES-INFO. Fax: (+1) 212-633-3680. E-mail: usinfo-f@elsevier.com].

Japan: Elsevier Science Customer Support Department, 9-15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106, Japan [Tel: (+3) 5561-5033. Fax: (3) 5561-5047. E-mail: kyf04035@niftyserve.or.jp].

Asia Pacific (excluding Japan): Elsevier Science (Singapore) Pte Ltd, No. 1 Temasek Avenue, 17-01 Millenia Tower, Singapore 039192. [Tel: (+65) 434-3727. Fax: (+65) 337-2230. E-mail: asiainfo@elsevier.com.sg].

Back Issues

Back issues of all previously published volumes are available direct from Elsevier Science Offices (Oxford and New York). Complete volumes and single issues can be purchased for 1992–96. Earlier issues are available in high quality photo-duplicated copies as complete volumes only.

PERIODICALS POSTAGE PAID AT NEWARK, NEW JERSEY. **Computers and Chemical Engineering (ISSN 0098-1354)** is published **13 times per year: monthly with one supplement issue,** by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. The annual subscription in the U.S.A. is US$1403. **Computers and Chemical Engineering** is distributed by Mercury Airfreight International Ltd, 10 Camptown Road, Irvington, New Jersey 07111-1105. POSTMASTER: Please send address corrections to **Computers and Chemical Engineering,** c/o Elsevier Science, RSO, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, U.S.A. [Tel: (+1) 212-633-3730/1-888 4ES-INFO. Fax: (+1) 212-633-3680. E-mail: usinfo-f@elsevier.com].

LIST OF CONTENTS

NUMBER 1

I. S. Melaaen and **G. Owren**	1	How do the inaccuracies of enthalpy and vapour–liquid equilibrium calculations influence baseload LNG plant design?
D. R. Lewin	13	A simple tool for disturbance resiliency diagnosis and feedforward control design
O. Agamennoni, J. L. Figueroa, A. C. Desages, A. Palazoglu and **J. A. Romagnoli**	27	A loop-shaping technique for feedback control design
J. Wärnå and **T. Salmi**	39	Dynamic modelling of catalytic three phase reactors
K. Kaczmarski	49	Use of orthogonal collocation on finite elements with moving boundaries in the simulation of non-linear multicomponent chromatography. Influence of fluid velocity variation on retention time in LC and HPLC
D. Dong and **T. J. McAvoy**	65	Nonlinear principal component analysis—based on principal curves and neural networks
I. Ashour and **G. Aly**	79	Effect of computation techniques for equation of state binary interaction parameters on the prediction of binary VLE data
R. Taylor, K. Achuthan and **A. Lucia**	93	Complex domain distillation calculations

NUMBER 2

L. J. Broadbelt, S. M. Stark and **M. T. Klein**	113	Computer generated reaction modelling: decomposition and encoding algorithms for determining species uniqueness
Ming-Quayer Chen, Chyi Hwang and **Yen-Ping Shih**	131	A wavelet–Galerkin method for solving population balance equations
S. J. Qin and **T. J. McAvoy**	147	Nonlinear FIR modeling via a neural net PLS approach
T. Suzuki, K. Ohtaguchi and **K. Koide**	161	Computer-assisted approach to develop a new prediction method of liquid viscosity of organic compounds
B. Schenker and **M. Agarwal**	175	Cross-validated structure selection for neural networks
C. A. Schnepper and **M. A. Stadtherr**	187	Robust process simulation using interval methods

G. E. Rotstein, R. Lavie and D. R. Lewin 201 Synthesis of flexible and reliable short-term batch production plans

N. Ishii and M. Muraki 217 A process-variability-based online scheduling system in multiproduct batch process

Announcement I

NUMBER 3

D. Mignon and J. Hermia 235 Complementarity of simulation and analytical methodologies—a design application

D. Mignon and J. Hermia 249 Peak utility load reduction in batch processes operated periodically and under uncertainty

G. Pagani, A. d'Arminio Monforte and G. Bianchi 265 An algorithm development for solving inexact simulation problems

V. Pillai, A. N. Beris and P. Dhurjati 275 Heuristics guided optimization of a batch autoclave curing process

M. Chidambaram and G. P. Reddy 295 Nonlinear control of systems with input and output multiplicities

M. Kavdia and M. Chidambaram 301 On-line controller tuning for unstable systems

P. K. Das 307 Monte Carlo simulation of drop breakage on the basis of drop volume

Announcement I

NUMBER 4

SELECTED PAPERS FROM THE IFAC WORKSHOP ON INTEGRATION OF PROCESS DESIGN AND CONTROL (IPDC '94)

E. Zafiriou v Guest Editorial

J. D. Perkins and S. P. K. Walsh 315 Optimization as a tool for design/control integration

O. Weitz and D. R. Lewin 325 Dynamic controllability and resiliency diagnosis using steady state process flowsheet data

Y. Cao, D. Biss and J. D. Perkins 337 Assessment of input–output controllability in the presence of control constraints

E. Zafiriou and H.-W. Chiou 347 On the dynamic resiliency of constrained processes

M. Soroush	357	Evaluation of achievable control quality in nonlinear processes
C. L. E. Swartz	365	A computational framework for dynamic operability assessment
S. Skogestad	373	A procedure for SISO controllability analysis—with application to design of pH neutralization processes
J. F. M. Van Dijk, S. De Wolf, R. Postma, L. C. Zullo, M. Guenin and **P. H. Gustafson**	387	Integrated process and process control design of a PP-splitter using a speedup and shell multivariable optimising control
J. Pohlmeier and **A. Rix**	395	Interactive plant and control design of a double-effect distillation column
L. Kalra and **C. Georgakis**	401	The effects of operational characteristics of catalytic cracking reactors on the closed-loop performance of linear model predictive controllers
L. P. Russo and **B. W. Bequette**	417	Effect of process design on the open-loop behavior of a jacketed exothermic CSTR
R. A. Eek, A. J. Hoogenboezem and **O. H. Bosgra**	427	Design issues related to the control of continuous crystallizers
M. Storz, M. Friedrich and **E. D. Gilles**	437	Process design and control for quality assurance
O. L. Cacon-Mondragon and **D. M. Himmelblau**	447	Integration of flexibility and control in process design
J. L. Figueroa, P. A. Bahri, J. A. Bandoni and **J. A. Romagnoli**	453	Economic impact of disturbances and uncertain parameters in chemical processes—a dynamic back-off analysis
R. D. Braatz, J. H. Lee and **M. Morari**	463	Screening plant designs and control structures for uncertain systems
V. White, J. D. Perkins and **D. M. Espie**	469	Switchability analysis

NUMBER 5

V. G. Landon	475	Temperature correction for packed bed multitubular reactors with concentric axial thermowells
M. Sánchez and **J. Romagnoli**	483	Use of orthogonal transformations in data classification–reconciliation
M. D. Graham and **I. G. Kevrekidis**	495	Alternative approaches to the Karhunen–Loève decomposition for model reduction and data analysis

S. E. Asplund and **R. K. Edvinsson** 507 A method for the rapid simulation of preparative liquid chromatography

D. K. Rollins, Y. Cheng and **S. Devanathan** 517 Intelligent selection of hypothesis tests to enhance gross error identification

M. S. Díaz and **J. A. Bandoni** 531 A mixed integer optimization strategy for a large scale chemical plant in operation

U. Nowak, J. Frauhammer and **U. Nieken** 547 A fully adaptive algorithm for parabolic partial differential equations in one space dimension

S. Jayakumar and **G. V. Reklaitis** 563 Chemical plant layout via graph partitioning—II. Multiple levels

Short Notes

E. F. Jacob and **M. Chidambaram** 579 Design of controllers for unstable first-order plus time delay systems

M. A. Myers, S. Kang and **R. H. Luecke** 585 State estimation and control for systems with delayed off-line measurements

Announcement I

NUMBER 6/7

SELECTED PAPERS FROM THE FIFTH INTERNATIONAL SYMPOSIUM ON PROCESS SYSTEMS ENGINEERING (PSE '94)

Kun Soo Chang 589 Preface

W. Marquardt 591 Trends in computer-aided process modeling

M. Oh and **C. C. Pantelides** 611 A modelling and simulation language for combined lumped and distributed parameter systems

J. D. Perkins, R. W. H. Sargent, R. Vázquez-Román and **J. H. Cho** 635 Computer generation of process models

S. E. Zitney, J. Mallya, T. A. Davis and **M. A. Stadtherr** 641 Multifrontal vs frontal techniques for chemical process simulation on supercomputers

S. H. Choi, D. A. Harney and **N. L. Book** 647 A robust path tracking algorithm for homotopy continuation

S. Ochs, P. Rosendorf, I. Hyanek, Xiaomang Zhang and **W. H. Ray** 657 Dynamic flowsheet modeling of polymerization processes using POLYRED

I. E. Grossmann and **M. M. Daichendt** 665 New trends in optimization-based approaches to process synthesis

L. Constantinou, K. Bagherpour, R. Gani, J. A. Klein and **D. T. Wu**	685	Computer aided product design: problem formulations, methodology and applications
M. G. Ierapetritou, J. Acevedo and **E. N. Pistikopoulos**	703	An optimization approach for process engineering problems under uncertainty
M. Homšak and **P. Glavič**	711	Pressure exchangers in pinch technology
J. F. Forbes and **T. E. Marlin**	717	Design cost: a systematic approach to technology selection for model-based real-time optimization systems
P. Tanartkit and **L. T. Biegler**	735	A nested, simultaneous approach for dynamic optimization problems—I
G. Stephanopoulos and **C. Han**	743	Intelligent systems in process engineering: a review
Dong Soo Nam, Chang Wook Jeong, Yong Jin Choe and **En Sup Yoon**	793	Operation-aided system for fault diagnosis of continuous and semi-continuous processes
D. M. Himmelblau and **T. W. Karjala**	805	Rectification of data in a dynamic process using artificial neural networks
M. J. Bagajewicz	813	On the probability distribution and reconcilation of process plant data
M. H. Bassett, P. Dave, F. J. Doyle III, G. K. Kudva, J. F. Pekny, G. V. Reklaitis, S. Subrahmanyam, D. L. Miller and **M. G. Zentner**	821	Perspectives on model based integration of process operations
J. H. Jung, H.-K. Lee and **I.-B. Lee**	845	Completion times algorithm of multi-product batch processes for common intermediate storage policy (CIS) with nonzero transfer and set-up times
R. Grau, M. Graells, J. Corominas, A. Espuña and **L. Puigjaner**	853	Global strategy for energy and waste analysis in scheduling and planning of multiproduct batch chemical processes
M. J. Realff, N. Shah and **C. C. Pantelides**	869	Simultaneous design, layout and scheduling of pipeless batch plants
R. J. Allgor, M. D. Barrera, P. I. Barton and **L. B. Evans**	885	Optimal batch process development
X. Zhang and **R. W. Sargent**	897	The optimal operation of mixed production facilities—a general formulation and some approaches for the solution
Y. Shimada, K. Suzuki and **H. Sayama**	905	Computer-aided operability study
Kazuyuki Shimizu	915	A tutorial review on bioprocess systems engineering

I. D. L. Bogle, A. R. Cockshott, M. Bulmer, N. Thornhill, M. Gregory and **M. Dehghani** 943 A process systems engineering view of biochemical process operations

P.-C. Fu and **J. P. Barford** 951 A hybrid neural network—first principles approach for modelling of cell metabolism

NUMBER 8

M. Türkay and **I. E. Grossmann** 959 Logic-based MINLP algorithms for the optimal synthesis of process networks

S. E. Flathouse and **J. B. Riggs** 979 Tuning GMC controllers using the ATV procedure

N. Vaklieva-Bancheva, B. B. Ivanov, N. Shah and **C. C. Pantelides** 989 Heat exchanger network design for multipurpose batch plants

R. Dunia H. and **T. F. Edgar** 1003 An improved generic model control algorithm for linear systems

K. Adebekun 1017 Output feedback control of a stirred tank reactor

Wei Li and **J. H. Lee** 1023 Control relevant identification of ill-conditioned systems: estimation of gain directionality

A. P. Peskin and **G. R. Hardin** 1043 An object-oriented approach to general purpose fluid dynamics software

S. B. Ramanand and **D. Phaneswara Rao** 1059 Modelling and simulation of NO_x absorption into water in a countercurrent flow packed column

Announcement I

NUMBER 9

M. F. Cardoso, R. L. Salcedo and **S. Feyo de Azevedo** 1065 The simplex–simulated annealing approach to continuous non-linear optimization

J. A. Uthgenannt 1081 Path and equipment allocation for multiple, concurrent processes on networked process plant units

T. Kanai, T. Uzumaki and **Y. Kawase** 1087 Simulation of airlift bioreactors: steady-state performance of continuous culture processes

J. T. Hsung and **D. M. Himmelblau** 1101 Detection of leaks in a liquid–liquid heat exchanger using passive acoustic noise

T. Cassou, P. Labat and **M. Polit** 1113 The development of a mathematical model of a chemical heat pump. The identification of thermal parameters

H. N. Cofer and M. A. Stadtherr 1123 Reliability of iterative linear equation solvers in chemical process simulation

B. Robitaille, B. Marcos, M. Veillette and G. Payre 1133 Modified quasi-Newton methods for training neural networks

Short notes

N. M. Iyer and A. E. Farell 1141 Design of a stable adaptive nonlinear observer for an exothermic stirred tank reactor

Ho-Kyung Lee, Jae Hak Jung and In-Beum Lee 1149 An evolutionary approach to optimal synthesis of multiproduct batch plant

Announcement I

NUMBER 10

Yi Cheng, T. W. Karjala and D. M. Himmelblau 1159 Resolving problems in closed loop nonlinear process identification using IRN

P. Seferlis and A. N. Hrymak 1177 Sensitivity analysis for chemical process optimization

R. M. Quinta Ferreira, C. A. Almeida-Costa and A. E. Rodrigues 1201 Effect of intraparticle convection on the transient behavior of fixed-bed reactors: finite differences and collocation methods for solving unidimensional models

N. E. Aguilera and G. Nasini 1227 Flexibility test for heat exchanger networks with non-overlapping inlet temperature variations

O. J. Chiotti, H. E. Salomone and O. A. Iribarren 1241 Batch plants with adaptive operating policies

R. Moros, H. Kalies, H. G. Rex and St Schaffarczyk 1257 A genetic algorithm for generating initial parameter estimations for kinetic models of catalytic processes

Announcement I

NUMBER 11

K. Kaczmarski and D. Antos 1271 Fast finite difference method for solving multi-component adsorption-chromatography models

M. Nikravesh, A. E. Farell and T. G. Stanford 1277 Model identification of nonlinear time variant processes via artificial neural network

Kwo-Liang Wu and Cheng-Ching Yu 1291 Reactor/separator processes with recycle—1. Candidate control structure for operability

D. E. Rivera and S. V. Gaikwad 1317 Digital PID controller design using ARX estimation

V. T. Voudouris and I. E. Grossman	1335	MILP model for scheduling and design of a special class of multipurpose batch plants
V. G. Doví, L. Maga and A. P. Reverberi	1361	On the identification of approximate models
Short note **P. Stehlík, J. Kohoutek and V. Jebáček**	1369	Simple mathematical model of furnaces and its possible applications
Erratum	I	
Announcement	III	

NUMBER 12

SELECTED PAPERS FROM THE EUROPEAN SYMPOSIUM ON COMPUTER AIDED PROCESS ENGINEERING—3 (ESCAPE-3)

H. J. Bart, F. Moser and H. Schnitzer	1373	Preface
A. Lucia, J. Xu and K. M. Layn	1375	Nonconvex process optimization
D. J. Costello, E. S. Fraga, N. Skilling, G. H. Ballinger, R. Bañares-Alcántara, J. Krabbe, D. M. Laing, R. C. McKinnel, J. W. Ponton and M. W. Spenceley	1399	**épée**: A support environment for process engineering software
A. Pages, H. Pingaud, M. Meyer and X. Joulia	1413	From process simulation to general estimation
Z. Novak, Z. Kravanja and I. E. Grossman	1425	Simultaneous synthesis of distillation sequences in overall process schemes using an improved MINLP approach
G. H. Weiss, J. A. Romagnoli and K. A. Islam	1441	Data reconcilliation—an industrial case study
I. M. Galván, J. M. Zaldívar, H. Hernández and E. Molga	1451	The use of neural networks for fitting complex kinetic data
R. Rieger, C. Weiss, G. Wigley, H.-J. Bart and R. Marr	1467	Investigating the process of liquid–liquid extraction by means of computational fluid dynamics
D. R. Lewin	1477	Multivariable feedforward control design using disturbance cost maps and a genetic algorithm
E. Sørensen, S. Macchietto, G. Stuart and S. Skogestad	1491	Optimal control and on-line operation of reactive batch distillation
M. G. Ierapetritou, E. N. Pistikopoulos and C. A. Floudas	1499	Operational planning under uncertainty

LIST OF CONTENTS

ESCAPE-6

Part A

G. Stephanopoulos and **E. Kondili**	xiii	Preface
		PROCESS DESIGN
J. Acevedo and **E. N. Pistikopoulos**	S1	Computational studies of stochastic optimization algorithms for process synthesis under uncertainty
N. D. K. Asante and **X. X. Zhu**	S7	An automated approach for heat exchanger network retrofit featuring minimal topology modifications
G. Athier, P. Floquet, L. Pibouleau and **S. Domenech**	S13	Optimization of heat exchanger networks by coupled simulated annealing and NLP procedures
C. B. Batistella and **M. R. W. Maciel**	S19	Modeling, simulation and analysis of molecular distillators: centrifugal and falling film
M. H. Bauer and **J. Stichlmair**	S25	Superstructures for the mixed integer optimization of nonideal and azeotropic distillation processes
Chr. Boyadjiev, B. Ivanov, N. Vaklieva-Bancheva, C. C. Pantelides and **N. Shah**	S31	Optimal energy integration in batch antibiotics manufacture
Massimiliano Barolo, G. Berto Guarise, Nicola Ribon, Sergio Rienzi, Antonio Trotta and **Sandro Macchietto**	S37	Some issues in the design and operation of a batch distillation column with a middle vessel
V. Briones and **A. Kokossis**	S43	A new approach for the optimal retrofit of heat exchanger networks
R. P. Byrne and **I. D. L. Bogle**	S49	An accelerated interval method for global optimisation
J. Bausa, R. v. Watzdorf and **W. Marquardt**	S55	Minimum energy demand for nonideal multi-component distillations in complex columns
B. Csukás, R. Lakner, K. Varga and **S. Balogh**	S61	Combining generated structural models with genetic programming in evolutionary synthesis
J. P. Dean and **G. A. Dervakos**	S67	Design of process-compatible biological agents
Burak Ozyurt, Praveen Mogili, Brad Mierau, Sermin G. Sunol and **Aydin K. Sunol**	S73	A hierarchical approach to simultaneous design of products and processes
Eric S. Fraga and **Teresa R. Senos Matias**	S79	Synthesis and optimization of a nonideal distillation system using a parallel genetic algorithm
Z. Fonyo and **N. Benkő**	S85	Enhancement of process integration by heat pumping

Stewart Goldfarb and **Joe Dealmeida**	S91	PDXI progress report
Truls Gundersen, Steinar Duvold and **Abdolreza Hashemi-Ahmady**	S97	An extended vertical MILP model for heat exchanger network synthesis
I. S. Gavrila and **P. Iedema**	S103	Phenomena-driven process design, a knowledge-based approach
R. Gutsche and **K. Hartmann**	S109	A Markovian intensities approach for predicting the behaviour of non-isothermal chemical reactors
Anna-Mari Heikkilä, Markku Hurme and **Martti Järveläinen**	S115	Safety considerations in process synthesis
Iiro Harjunkoski, Tapio Westerlund, Johnny Isaksson and **Hans Skrifvars**	S121	Different formulations for solving trim loss problems in a paper-converting mill with ILP
C. S. Horn, M. S. Doulah, W. Stannek and **W. O. George**	S127	Computer-aided process design: the design of an affinity-based continuous separation process
Steinar Hauan and **Kristian M. Lien**	S133	Geometric visualisation of reactive fixed points
Patricia M. Hoch and **Ana M. Eliceche**	S139	Flexibility analysis leads to a sizing strategy in distillation columns
Anne Krogh Jensen and **Rafiqul Gani**	S145	A computer aided system for generation of problem specific process models
Cecilia Jaksland and **Rafiqul Gani**	S151	An integrated approach to process/product design and synthesis based on properties–process relationship
L. Jourda, X. Joulia and **B. Kœhret**	S157	Introducing ATOM, the Applied Thermodynamics Object-oriented Model
Ralph Jacobs, Wouter N. H. Jansweijer and **Piet Iedema**	S165	A knowledge based system for reactor selection
J. M. P. King and **R. Bañares-Alcántara**	S171	The extension and evolution of the process design representation
C. T. Kiranoudis, Z. B. Maroulis and **D. Marinos-Kouris**	S177	Drying of solids: selection of some continuous operation dryer types
M. Krajnc and **P. Glavič**	S183	Prices of utilities and process structure
M. E. Lienqueo, E. W. Leser and **J. A. Asenjo**	S189	An expert system for the selection and synthesis of multistep protein separation processes
Ho-Kyung Lee and **In-Beum Lee**	S195	A synthesis of multiproduct batch plants considering both in-phase and out-of-phase modes

Seungkwon Lee and **Sunwon Park**	S201	Synthesis of mass exchange network using process graph theory
H. M. S. Lababidi, I. M. Alatiqi and **R. Bañares-Alcántara**	S207	Application of controllability analysis tools during the conceptual design stage
B. Lohmann and **W. Marquardt**	S213	On the systematization of the process of model development
R. F. Martini and **M. R. Wolf-Maciel**	S219	A new methodology for mixture characterization and solvent screening for separation process application
F. Marechal and **B. Kalitventzeff**	S225	Targeting the minimum cost of energy requirements: a new graphical technique for evaluating the integration of utility systems
E. Marcoulaki and **A. Kokossis**	S231	Stochastic optimisation of complex reaction systems
Timothy F. McKenna	S237	Computer aided process design: short-cut design for polymer production
V. S. Vassiliadis	S243	Application of the modified barrier method in large-scale quadratic programming problems
Jan Sandvig Nielsen, Mogens Weel Hansen and **Sten bay Joergensen**	S249	Heat exchanger network modelling framework for optimal design and retrofitting
Santosh Noronha and **Günter Gruhn**	S255	Synthesis and optimization of an isothermal CSTR-network for the cyclohexane oxidation process
M. Nicmanis and **M. J. Hounslow**	S261	A finite element analysis of the steady state population balance equation for particulate systems: aggregation and growth
E. Perez-Cisneros, M. Schenk, R. Gani and **P. A. Pilavachi**	S267	Aspects of simulation, design and analysis of reactive distillation operations
R. G. H. Prince and **A. F. Connolly**	S273	Heuristic decisions in an evolutionary design system
M. H. Pescarini, A. A. C. Barros and **M. R. Wolf-Maciel**	S279	Development of a software for simulating separation processes using a nonequilibrium stage model
Jorge R. Paloschi	S285	Using sparse bounded homotopies in steady state simulation packages
Jorge R. Paloschi	S291	Steady state simulation using MIMD machines in the speedup simulator
A. Palau, A. Delgado, E. Velo and **L. Puigjaner**	S297	Use of neural networks for predicting the performance of discontinuous gas–solid chilling machines
J. M. Reneaume, M. Meyer, J. J. Letourneau and **X. Joulia**	S303	A global MINLP approach for phase equilibrium calculations

R. Vázquez-Román, J. M. P. King and **R. Bañares-Alcántara**	S309	*KBMoSS*: a process engineering modelling support system
N. J. Samsatli and **N. Shah**	S315	Optimal integrated design of biochemical processes
Y. Shabtai, M. Ronen, I. Mukmenev and **H. Guterman**	S321	Monitoring micorbial morphogenetic changes in a fermentation process by a self-tuning vision system (STVS)
Joerg Schmuhl, Rolf Hartmann, Holger Müller and **Klaus Hartmann**	S327	Structural parameter approach and multicriteria optimization techniques for complex chemical engineering design
Hans Skrifvars, Iiro Harjunkoski, Tapio Westerlund, Zdravko Kravanja and **Ray Pörn**	S333	Comparison of different MINLP methods applied on certain chemical engineering problems
Ignacio E. Grossmann and **Metin Türkay**	S339	Solution of algebraic systems of disjunctive equations
N. Voros, Z. B. Maroulis and **D. Marinos-Kouris**	S345	Optimization of reverse osmosis networks for seawater desalination
K. Varga and **B. Csukás**	S351	New solution of stiff problems by automatic transformation of the structural model
P. P. C. Wai, I. D. L. Bogle, K. Bagherpour and **R. Gani**	S357	Process synthesis and simulation strategies for integrated biochemical process design
Xiaoming Yang and **Colin McGreavy**	S363	Requirements for sharing process data in the life cycle of process plants
Horacio Leone	S369	A knowledge-based system for HAZOP studies. The knowledge representation structure
Ajay Modi, João Paulo Aumond, Michael Mavrovouniotis and **George Stephanopoulos**	S375	Rapid plant-wide screening of solvents for batch processes
D. Lionel O'Young and **Yukikazu Natori**	S381	Process synthesis: technology, environment and applications
Urmila M. Diwekar and **Jayant R. Kalagnanam**	S389	Robust design using an efficient sampling technique
James Z. Hua, Joan F. Brennecke and **Mark A. Stadtherr**	S395	Reliable phase stability analysis for cubic equation of state models
L. N. Bugaeva, Yu. A. Beznosik, G. A. Statjukha and **A. A. Kvitka**	S401	An application of expert system to choice, simulation and development of gases purification processes
Zhengrong Gu, L. Harry Lam and **Prasad S. Dhurjati**	S407	Feature correlation method for enhancing fermentation development: a comparison of quadratic regression with artificial neural networks

C. D. Maranas, C. M. McDonald, S. T. Harding and **C. A. Floudas**	S413	Locating all azeotropes in homogeneous azeotropic systems
C. S. Adjiman, I. P. Androulakis, C. D. Maranas and **C. A. Floudas**	S419	A global optimization method, αBB, for process design
A. A. Linninger, M. Hofer, H. Krendl, H. Druckenthaner and **H. P. Jörgl**	S425	*M*-PROJECT-organizing problem representation and modeling of steady state and dynamic processes
V. V. Kafarov, I. N. Dorokhov, A. Ramirez and **N. I. Kafarova**	S431	Computer aided design of multifunctional composite materials
Brett W. Schug and **Matthew J. Realff**	S435	Design of standardized, modular, chemical processes
Noemi C. Petracci, Patricia M. Hoch and **Ana M. Eliceche**	S443	Flexibility analysis of an ethylene plant
A. Pertsinidis, E. Papadopoulos and **C. Kiparissides**	S449	Computer aided design of polymer reactors
Duško Bikić and **Peter Glavič**	S455	Innovative designs of reactor networks from reaction and mixing principles
G. D. Saravacos and **A. E. Kostaropoulos**	S461	Engineering properties in food processing simulation
P. A. Pilavachi	S467	Systems modelling as a design tool for energy efficiency-research within the European Union

PROCESS OPERATIONS

F. J. Kleinschrodt III, and **J. D. Jones**	S473	Industrial vision for process optimization
E. O. Bewaji-Adedeji and **R. J. Best**	S485	Flowsheet simulation of coffee extraction: a continuous cyclic process
Reinaldo A. Silva, Claudio M. Buiatti, Sandra L. Cruz and **João A. F. R. Pereira**	S491	Pressure wave behaviour and leak detection in pipelines
J. Chen, A. Bandoni and **J. A. Romagnoli**	S497	Robust statistical process monitoring
V. D. Dimitriadis, J. Hackenberg, N. Shah and **C. C. Pantelides**	S503	A case study in hybrid process safety verification
Isabel Enes and **Pedro Saraiva**	S509	Optimization of operating strategies in β-carotene microalgae bioreactors

Ali Elkamel, Mansour Karkoub and **Ridha Gharbi**	S515	A neural network prediction model of fluid displacements in porous media
K. Fakhr-Eddine, M. Cabassud, P. Duverneuil, M. V. Le Lann and **J. P. Couderc**	S521	Use of neural networks for LPCVD reactors modelling
Jose L. Figueroa, A. C. Desages and **Jose A. Romagnoli**	S527	Steady-state back-off calculation: use of piecewise lineal approximation
Günter Gruhn and **Stefan Colditz**	S533	Interval approach to process system engineering problems
G. Heyen, E. Maréchal and **B. Kalitventzeff**	S539	Sensitivity calculations and variance analysis in plant measurement reconciliation
M. Ignova, G. C. Paul, J. Glassey, A. C. Ward, G. A. Montague, C. R. Thomas and **M. N. Karim**	S545	Towards intelligent process supervision: industrial penicillin fermentation case study
C. Loeblein and **J. D. Perkins**	S551	Economic analysis of different structures of on-line process optimization systems
Kang Wook Lee, Kang Ju Lee, Soo Hyoung Choi and **En Sup Yoon**	S557	Stochastic dynamic simulation of chemical processes with changing uncertainties
D. J. Kyriakopoulou and **B. Kalitventzeff**	S563	Validation of measurement data using an interior point SQP
Angelo Lucia and **Xinzhou Guo**	S569	Feasibility in chemical process design and operations
Arndt Mehlhorn, Antonio Espuña, Ana Bonsfills, Andrzej Górak and **Luis Puigjaner**	S575	Modeling and experimental validation of both mass transfer and tray hydraulics in batch distillation
G. Fevotte, I. Barudio and **T. F. McKenna**	S581	Computer-aided parameter estimation and on-line monitoring of emulsion and solution polymerisation reactors
Gheorghe Maria and **David W. T. Rippin**	S587	Recursive robust kinetics estimation by using a mechanistic short-cut technique and a pattern-recognition procedure
K. Y. Mau, P. F. Nolan and **C. H. Steele**	S593	The development of a real-time emergency advisory system for batch reactors
E. B. Martin, A. J. Morris, M. C. Papazoglou and **C. Kiparissides**	S599	Batch process monitoring for consistent production
Dong Soo Nam, Chonghun Han, Chang Wook Jeong and **En Sup Yoon**	S605	Automatic construction of extended symptom-fault associations from the signed digraph

P. J. K. Nott, M. N. Karim and A. J. Morris	S611	Fault and contamination detection in a continuous bakers yeast fermentation
G. M. Ostrovsky, Yu. M. Volin and D. V. Golovashkin	S617	Evaluation of chemical processes flexibility
George J. Prokopakis and Zacharias B. Maroulis	S623	Real-time management and optimisation of industrial utilities systems
Kjell Støle-Hansen and Ole Morten Dotterud	S629	Dynamic modelling of pH controlled precipitation and dissolution in an aqueous solution
A. Szücs, M. Gerzson and K. M. Hangos	S635	An intelligent diagnostic system based on Petri nets
H. Schmidt-Traub and J. Strube	S641	Dynamic simulation of simulated-moving-bed chromatographic processes
Chii-Shang Tsai and Chuei-Tin Chang	S647	A statistics based approach to enhancing safety and reliability of the batch-reactor charging operation
S. Tessendorf, R. Gani and M. L. Michelsen	S653	Aspects of modeling, design and operation of membrane-based separation processes for gaseous mixtures
G. L. Vachkov and N. G. Christova	S659	Soft computing method for solving the problem of diagnosis and correction of measurement errors
R. Wennersten, R. Narfeldt, A. Gränfors and S. Sjökvist	S665	Process modelling in fault diagnosis
X. Z. Wang, S. A. Yang, S. H. Yang and C. McGreavy	S671	The application of fuzzy qualitative simulation in safety and operability assessment of process plants
J. C. C. Young, C. L. E. Swartz and R. Ross	S677	On the effects of constraints, economics and uncertain disturbances on dynamic operability assessment
Luca Zullo	S683	Validation and verification of continuous plants operating modes using multivariate statistical methods
L. F. M. Zorzetto and J. A. Wilson	S689	Monitoring bioprocesses using hybrid models and an extended Kalman filter
I. Zbiciński, P. Strumiłło and W. Kamiński	S695	Hybrid neural model of thermal drying in a fluidized bed
Victor M. Saucedo and M. Nazmul Karim	S701	On-line optimization of stochastic processes using Markov Decision Processes
William F. Feehery and Paul I. Barton	S707	Dynamic simulation and optimization with inequality path constraints

Ricardo Dunia, S. Joe Qin, Thomas F. Edgar and Thomas J. McAvoy S713 Use of principal component analysis for sensor fault identification

Rajagopalan Srinivasan and Venkat Venkatasubramanian S719 Petri net-Digraph models for automating HAZOP analysis of batch process plants

Oliver J. Schraa and Cameron M. Crowe S727 The numerical solution of bilinear data reconciliation problems using unconstrained optimization methods

Hongwei Tong and Cameron M. Crowe S733 Detecting persistent gross errors by sequential analysis of principal components

Neal B. Gallagher, Barry M. Wise and Charles W. Stewart S739 Application of multi-way principal components analysis to nuclear waste storage tank monitoring

Theodora Kourti, Jennifer Lee and John F. MacGregor S745 Experiences with industrial applications of projection methods for multivariate statistical process control

J. S. Anderson, I. G. Kevrekidis and R. Rico-Martinez S751 A comparison of recurrent training algorithms for time series analysis and system identification

K. N. Theologos, I. D. Nikou, A. I. Lygeros and N. C. Markatos S757 Simulation and design of fluid-catalytic cracking riser-type reactors

K. P. Papalexandri, E. N. Pistikopoulos, B. Kalitventzeff, M. N. Dumont, K. Urmann and J. Gorschluter S763 Operation of a steam production network with variable demands modelling and optimization under uncertainty

Part B

PLANT AND PROCESS CONTROL

Paulo A. F. N. A. Afonso, Nuno M. C. Oliveira and José Almiro A. M. Castro S769 Model predictive control of a pilot plant reactor with a simulated exothermic reaction

C. Boyaci, D. Uztürk, A. E. Ş. Konukman and U. Akman S775 Dynamics and optimal control of flexible heat-exchanger networks

M. L. Bell, D. J. N. Limebeer and R. W. H. Sargent S781 Robust receding horizon optimal control

Parisa A. Bahri, Alberto Bandoni and Jose Romagnoli S787 Operability assessment in chemical plants

Y. S. Cheng, C. F. Abi and L. S. Kershenbaum S793 On-line estimation for a fixed-bed reactor with catalyst deactivation using nonlinear programming techniques

R. Berber and S. Coşkun S799 Dynamic simulation and quadratic dynamic matrix control of an industrial low density polyethylene reactor

A. C. Dimian, A. J. Groenendijk and **P. Iedema**	S805	Systems analysis in handling impurities in complex plants
Stewart Goldfarb and **John Oldham**	S811	Refrigeration loop dynamic analysis using PROTISS
V. Goggos and **R. E. King**	S817	Evolutionary predictive control (EPC)
B. Glemmestad, K. W. Mathisen and **T. Gundersen**	S823	Optimal operation of heat exchanger networks based on structural information
Jun Ju and **Min-Sen Chiu**	S829	On-line performance monitoring of two-inputs–two-outputs multiloop control systems
A. Koggersbøl, T. R. Andersen, J. Bagterp and **S. B. Jørgensen**	S835	An output multiplicity in binary distillation: experimental verification
Youngwoon Kwon and **En Sup Yoon**	S841	A method for improving condition number of chemical processes by sensitivity analysis
Maja Atanasijević-Kunc, Srečko Milanič and **Rihard Karba**	S847	Expert-aided learning procedure in control design for the pressure-level plant
A. Koggersbøl, B. R. Andersen, J. S. Nielsen and **S. Bay Jørgensen**	S853	Control configurations for an energy integrated distillation column
Felipe Lopez-Isunza, Jose Alvarez-Ramirez and **Ricardo Aguilar**	S859	An strategy to regulate temperature in FCC units with poor knowledge of chemical kinetics
Daniel R. Lewin	S865	Modelling and control of an industrial PVC suspension polymerization reactor
Daniel R. Lewin and **David Bogle**	S871	Controllability analysis of an industrial polymerization reactor
Jun-Sien Lin and **Shi-Shang Jang**	S877	Nonlinear rule based process control-analysis and reduction of the rule set by nonlinear theorey
P. Mizsey and **I. Kalmar**	S883	Effects of recycle on control of chemical processes
Venkatramana N. Reddy, Paul M. Riley and **Michael L. Mavrovouniotis**	S889	Analysis of plant measurements through input-training neural networks
M. J. Mohideen, J. D. Perkins and **E. N. Pistikopoulos**	S895	Optimal synthesis and design of dynamic systems under uncertainty
H. I. Moe, H. C. Riksheim and **T. Hertzberg**	S901	Stiffness reduction of gas system models
D. Semino and **C. Scali**	S907	Multiloop autotuning using relay feedback: limits and extensions

D. Semino, M. Morretta and C. Scali	S913	Parameter estimation in Extended Kalman Filters for quality control in polymerization reactors
Yudi Samyudia, Peter L. Lee, Ian T. Cameron and Michael Green	S919	Control of multi-unit processing plants—a systematic methodology
J. Savkovic-Stevanovic	S925	Neural net controller by inverse modeling for a distillation plant
Igor Škrjanc, Katarina Kavšek-Biasizzo, Drago Matko and Oliver Hecker	S931	Fuzzy predictive control based on relational matrix models
P. Turner, G. Montague and J. Morris	S937	Dynamic neural networks in non-linear predictive control (an industrial application)
D. Uztürk, A. E. Ş. Konukman, C. Boyaci and U. Akman	S943	Operability of an autothermal reactor linked to a flexible heat-exchanger network
Klaus Webers and Sebastian Engell	S949	Controller structure evaluation by convex optimization
S. De Wolf, R. L. E. Cuypers, L. C. Zullo, B. J. Vos and B. J. Bax	S955	Model predictive control of a slurry polymerisation reactor
G. Zamponi, J. Stichlmair, A. Gerstlauer and E. D. Gilles	S963	Simulation of the transient behaviour of a stirred liquid/liquid extraction column
Irven H. Rinard	S969	Core models, coordinators, and connectors in the dynamic modeling and simulation of multiphase systems
M. Amrhein, B. Srinivasan, D. Bonvin and M. M. Schumacher	S975	Inferring concentrations on-line from near-infrared spectra: nonlinear calibration *via* mid-infrared measurements
Heinz A. Preisig	S981	Computer-aided modelling—two paradigms on control
E. Gazi, L. H. Ungar, W. D. Seider and B. J. Kuipers	S987	Automatic analysis of Monte-Carlo simulations of dynamic chemical plants
H. N. Al-Duwaish and M. Nazmul Karim	S993	New methodology for identification and control of plants with static input or output nonlinearities
Christine S. Ng and George Stephanopoulos	S999	Synthesis of control systems for chemical plants
S. Skogestad and K. Havre	S1005	The use of RGA and condition number as robustness measures

Wangyan Feng, Hasmet Genceli and **Michael Nikolaou**	S1011	Constrained model predictive control with simultaneous identification using wavelets
W. Luo, M. N. Karim, A. J. Morris and **E. B. Martin**	S1017	Control relevant identification of a pH waste water neutralisation process using adaptive radial basis function networks
A. K. M. S. Rahman and **Srinivas Palanki**	S1023	On-line optimization of batch reactors with two manipulated inputs
Christos E. Frouzakis, Raymond A. Adomaitis and **Ioannis G. Kevrekidis**	S1029	An experimental and computational study of subcriticality, hysteresis and global dynamics for a model adaptive control system
Mike J. Doma, Paul A. Taylor and **Peter J. Vermeer**	S1035	Closed loop identification of MPC models for MIMO processes using genetic algorithms and dithering one variable at a time: application to an industrial distillation tower
Bernd Wittgens, Rajab Litto, Eva Sørensen and **Sigurd Skogestad**	S1041	Total reflux operation of multivessel batch distillation
C. Jaeckle and **J. MacGregor**	S1047	Product design through multivariate statistical analysis of process data
Philip A. Wisnewski and **Francis J. Doyle III**	S1053	A reduced model approach to estimation and control of a Kamyr digester
Apostolos Rigopoulos and **Yaman Arkun**	S1059	Principal components analysis in estimation and control of paper machines
H. Sarimveis, H. Genceli and **M. Nikolaou**	S1065	Rigorous design of robust predictive controllers for processes with more inputs than outputs
Panagiotis D. Christofides and **Prodromos Daoutidis**	S1071	Nonlinear control of diffusion–convection-reaction processes
Ivan Miletic and **Thomas Marlin**	S1077	Results analysis for real-time optimization (RTO): deciding when to change the plant operation
Joseph Boyce	S1083	Multivariable cascade control for processes with output constraints
R. Rico-Martinez, J. S. Anderson and **I. G. Kevrekidis**	S1089	Self-consistency in neural network-based NLPC analysis with applications to time-series processing
Jannie S. J. Van Deventer, Derick W. Moolman and **Chris Aldrich**	S1095	Visualisation of plant disturbances using self-organising maps
Nicos Karcanias	S1101	Control problems in global process instrumentation: a structural approach

D. A. Manolas, T. P. Gialamas, C. A. Frangopoulos and D. T. Tsahalis S1107 A genetic algorithm for operation optimization of an industrial cogeneration system

C. Kiparissides and J. Morris S1113 Intelligent manufacturing of polymers

Antonio A. Alonso and B. Erik Ydstie S1119 Process systems, passivity and the second law of thermodynamics

V. Marinoiu, N. Paraschiv, Cr. Patrascioiu and V. Cartoaje S1125 Advanced control system for crude oil plant—a case study

COMPUTER INTEGRATED FLEXIBLE MANUFACTURING SYSTEMS

M. Flender, G. Fieg and G. Wozny S1131 Classification of new product changeover strategy (NPS) for different application of distillation columns

M. Graells, A. Espuña and L. Puigjaner S1137 Sequencing intermediate products: a practical solution for multipurpose production scheduling

Raimon Grau, Antonio Espuña and Luís Puigjaner S1143 Completion times in multipurpose batch plants with set-up, transfer and clean-up times

Minseok Kim, Jae Hak Jung and In-Beum Lee S1149 Intelligent scheduling and monitoring for multi-product networked batch processes

Ming Liang Lu, Rafael Batres and Yuji Naka S1155 A hypermanager for a computer integrated concurrent process engineering environment

Renping Liu and Colin McGreavy S1161 A framework for operation strategy of pipeless batch plants

C. McGreavy, X. Z. Wang, M. L. Lu, M. Zhang and S. H. Yang S1167 Objects, agents and work flow modelling for concurrent engineering process design

Linas Mockus and Gintaras V. Reklaitis S1173 Continuous time representation in batch/semicontinuous process scheduling: randomized heuristics approach

G. Nicolas, G. E. Rotstein, A. P. F. D. Barbosa-Póvoa and S. Macchietto S1179 A branch and bound procedure for the design of multipurpose batch plants with uncertain demands

Roberto Orru, Barbara Simoncini, Pier Fortunato Virdis and Giacomo Cao S1185 Computer-aided manufacturing of centrifugal SHS coatings

Seza Orçun, İ. Kuban Altinel and Öner Hortaçsu S1191 Scheduling of batch processes with operational uncertainties

J. M. Pinto and I. E. Grossmann S1197 A continuous time MILP model for short term scheduling of batch plants with pre-ordering constraints

Damrong Pradubsripetch, Sanggyu Lee, Arif Adriani and **Yuji Naka**	S1203	Real time generation of operating procedures to support flexible start-up operation
E. N. Pistikopoulos, T. V. Thomaidis, A. Melin and **M. G. Ierapetritou**	S1209	Flexibility, reliability and maintenance considerations in batch plant design under uncertainty
M. T. M. Rodrigues, L. Gimeno, C. A. S. Passos and **M. D. Campos**	S1215	Reactive scheduling approach for multipurpose chemical batch plants
G. Schilling and **C. C. Pantelides**	S1221	A simple continuous-time process scheduling formulation and a novel solution algorithm
N. Shah	S1227	Mathematical programming techniques for crude oil scheduling
N. Shah, L. Liberis, E. Izumoto and **R. Henson**	S1233	Integrated batch plant design: a polymer plant case study
Craig W. Schmidt and **Ignacio E. Grossmann**	S1239	A mixed integer programming model for stochastic scheduling in new product development
J. Simensen and **B. A. Foss**	S1245	A concept for modelling batch plant operation
B. Meister, J. M. C. Clark and **N. Shah**	S1251	Optimisation of oilfield exploitation under uncertainty
E. Sørensen and **S. Skogestad**	S1257	Optimal startup procedures for batch distillation
E. Sanmartí, A. Huercio, A. Espuña and **L. Puigjaner**	S1263	A combined scheduling/reactive scheduling strategy to minimize the effect of process operations uncertainty in batch plants
Vasilios T. Voudouris	S1269	Mathematical programming techniques to debottleneck the supply chain of fine chemical industries
S. J. Wilkinson, A. Cortier, N. Shah and **C. C. Pantelides**	S1275	Integrated production and distribution scheduling on a Europe-wide basis
Konrad Wöllhaf, Martin Fritz, Christian Schulz and **Sebastian Engell**	S1281	BaSiP—batch process simulation with dynamically reconfigured process dynamics
Zhang Xueya and **R. W. H. Sargent**	S1287	The optimal operation of mixed production facilities—extensions and improvements
Gabriela P. Henning and **Jaime Cerdá**	S1295	A knowledge-based approach to production scheduling for batch processes
Heinz A. Preisig	S1301	A mathematical approach to discrete-event dynamic modelling of hybrid systems
D. W. Pierce and **M. J. Realff**	S1307	Process synthesis and design for multi-chip module fabrication

USE OF COMPUTERS IN THE EDUCATION OF CHEMICAL ENGINEERS

R. W. H. Sargent	S1317	A new vista for chemical engineering
I. David L. Bogle	S1323	An introductory course in computer aided process engineering (CAPE)
M. Shacham, N. Brauner and M. Pozin	S1329	Application of feedback control principles for solving differential-algebraic systems of equations in process control education
V. Jovan and J. Petrovčič	S1335	Process laboratory—a necessary resource in control engineering education
H. O. Kassim and R. G. Cadbury	S1341	The place of the computer in chemical engineering education
Daniel R. Lewin, Joav Rockman and Ram Lavie	S1347	Teaching advanced process control to undergraduates
C. M. Merrick and J. W. Ponton	S1353	The ECOSSE Control HyperCourse
P. L. de Vaal	S1359	Controlling a nonlinear process with variable dead-time: a computer-based laboratory experiment
Dongil Shin and Venkat Venkatasubramanian	S1365	Intelligent tutoring system framework for operator training for diagnostic problem solving
Thomas E. Marlin	S1371	The software laboratory for undergraduate process control education

COMPUTER AIDED TECHNIQUES FOR ENVIRONMENTAL ASPECTS AND CONSIDERATIONS

A. D. Elliott, B. Sowerby and B. D. Crittenden	S1377	Quantitative environmental impact analysis for clean design
G. Kalampoukas and G. A. Dervakos	S1383	Process optimization for clean manufacturing: supercritical fluid extraction for β-carotene production
R. Maciel Filho, M. R. Wolf Maciel, A. Domingues and A. O. Stinghen	S1389	Computer aided design of acetaldehyde plant with zero avoidable pollution
M. N. Pons, L. Pereira, N. Roche, B. Weiss, C. Prost and J. P. Corriou	S1395	Methodology for the development of a wastewater treatment plant simulator
E. Rascol, M. Meyer and M. Prevost	S1401	Simulation and parameter sensitivity analysis of acid gas absorption into mixed alkanolamine solutions
D. A. Sarigiannis	S1407	Computer-aided design for environment in the process industries
P. N. Sharratt and A. Kiperstok	S1413	Environmental optimisation of releases from industrial sites into a linear receiving body

S. K. Stefanis, A. Buxton, A. G. Livingston and E. N. Pistikopoulos — S1419 — A methodology for environmental impact minimization: solvent design and reaction path synthesis issues

U. Wiesner, M. Wittig and A. Górak — S1425 — Design and optimization of a nitric acid recovery plant from nitrous waste gases

Andreas A. Linninger, Shahin A. Ali and George Stephanopoulos — S1431 — Knowledge-based validation and waste management of batch pharmaceutical process designs

Tekin Kunt, Laurent Ratton, Thomas McAvoy, Thomas Fuja, Steve Semancik and Richard Cavicchi — S1437 — Towards the development of an artificial nose for chemical process applications

Venkatesh Narayan, Urmila M. Diwekar and Mark Hoza — S1443 — Synthesizing optimal waste blends

A. K. Kordon, P. S. Dhurjati and B. J. Bockrath — S1449 — On-line expert system for odor complaints in a refinery

S. R. Weijers, J. J. Kok, H. A. Preisig, A. Buunen and T. W. M. Wouda — S1455 — Parameter identifiability in the IAWQ Model No. 1 for modelling activated sludge plants for enhanced nitrogen removal

M. Rovaglio, D. Manca, G. Pazzaglia and G. Serafini — S1461 — Inverse response compensation for the optimal control of municipal incineration plants: model synthesis and experimental validation

INDUSTRIAL APPLICATIONS OF PROCESS SYSTEMS ENGINEERING. APPLICATIONS AND CASE STUDIES

Yukikazu Natori and Lionel O'Young — S1469 — Vision of 21st century's plant and how to get there

Nicholas Alsop, Luca Solfaroli Camillocci, Arturo Sanchez and Sandro Macchietto — S1481 — Synthesis of procedural controllers—application to a batch pilot plant

M. Bistolfi, A. Malandrino and N. Mancini — S1487 — The use of different modelling approaches and tools to support research activities: an industrial example

L. Costa, P. Santos, J. Ataíde and P. Saraiva — S1493 — Operating data generation and analysis in a pulp and paper plant

S. Diaz, A. Serrani, A. Bandoni and E. A. Brignole — S1499 — A study on the capital and operating alternatives in an ethane extraction plant

M. P. Foscolos, M. Sideris and S. Nilchan — S1505 — The development and application of an integrated modelling system for lignite quality analysis

L. G. Gomes and **M. R. Wolf-Maciel**	S1511	Development of a methodology to reproduce and to optimize the operating conditions of a natural gas processing unit
Douglas G. Harrell	S1517	A non-linear model-based horizon algorithm for use in event-driven supervisory control
Károly Kmetty, Attila Lóránt, Géza Horváth and **László Arányi**	S1521	Production of high purity CH products by liquid adsorption on molecular sieve materials
C. Lindheim, T. Totland and **K. M. Lien**	S1527	Enterprise modeling. A new task for process systems engineers?
M. L. Preston, D. C. Richards and **A. G. Rushton**	S1533	CAPE-crusading for process safety: an industrial perspective
S. Pierucci, P. Brandani, E. Ranzi and **A. Sogaro**	S1539	An industrial application of an on-line data reconciliation and optimization problem
Kristian Lien and **Tony Perris**	S1545	Industry and academia. Rebuilding the partnership
Kristian Lien and **Tony Perris**	S1551	Future directions for CAPE research. Perceptions of industrial needs and opportunities
M. Sánchez, G. Sentoni, S. Schbib, S. Tonelli and **J. Romagnoli**	S1559	Gross measurements error detection/identification for an industrial ethylene reactor
T. Tahmassebi	S1565	Industrial experience with a mathematical-programming based system for factory systems planning/scheduling
Arja Toola and **Jouko Heikkilä**	S1571	Concurrent safety engineering in process design
Chi-Wai Hui and **Yukikazu Natori**	S1577	An industrial application using mixed-integer programming technique: a multi-period utility system model
B. Wayne Bequette	S1583	Operability analysis of an exothermic semi-batch reactor
Ramesh Vaidhyanathan and **Venkat Venkatasubramanian**	S1589	Experience with an expert system for automated HAZOP analysis
F. Laganier	S1595	Dynamic process simulation trends and perspectives in an industrial context
S. S. Voutetakis, A. A. Lappas, D. K. Iatridis and **I. A. Vasalos**	S1601	Computer application and software development for the automation of a fluid catalytic cracking pilot plant—experimental results
Argyrios Lygeros, Zacharias B. Maroulis and **George J. Prokopakis**	S1607	An integrated software package for total site integration and utilities design

K. Pohl, R. Dömges and **M. Jarke** S1613 Tool integration support for modeling in open-CAPE environments

Stany Schrans, Sjoerd de Wolf and **Richard Baur** S1619 Dynamic simulation of reactive distillation: an MTBE case study

Antonio Lopez, Juan J. Pedraza and **Bernardo Del Amo** S1625 Industrial application of a simulation model for high pressure polymerization of ethylene

E. D. De Jong, H. Keuken, E. Van Der Pol, E. Den Dekker and **E. J. H. Kerckhoffs** S1631 Exergy analysis of industrial processes using AI techniques

ADDENDUM

Jeffrey J. Siirola S1637 Strategic process synthesis: advances in the hierarchical approach
